

COMPANY PROFILE

ABOUT US

At Elegant Systems, we believe technology should make life simpler – not more complicated. We're an automation company built around one core idea: smart technology should feel effortless, intuitive, and beautifully integrated into your space. With over a decade focused exclusively on automation, and more than 40 years of combined team experience, we know how to bring complex systems together in a way that just works.

Automation can be overwhelming. There are endless products, platforms, and technical details. That's where we come in. We handle the complexity behind the scenes so you can enjoy the comfort, control, and peace of mind that smart technology offers.

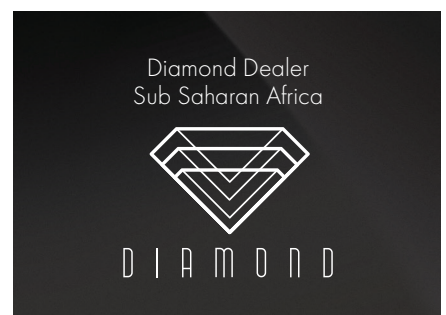

From design and engineering to installation and aftercare, our team works closely together to deliver reliable systems and long-term support you can count on. We don't just install technology. We create smarter ways to live and work.

OUR MISSION

Our mission is simple: to transform everyday spaces into intelligent environments that feel natural and easy to use.

Whether it's a home, hotel, or commercial building, we design solutions that improve comfort, efficiency, security, and overall experience. We focus on creating systems that blend into your lifestyle – technology that supports you without demanding attention.

AWARDS

WHAT WE DO

Elegant Systems designs and installs fully integrated automation solutions across a range of sectors, including:

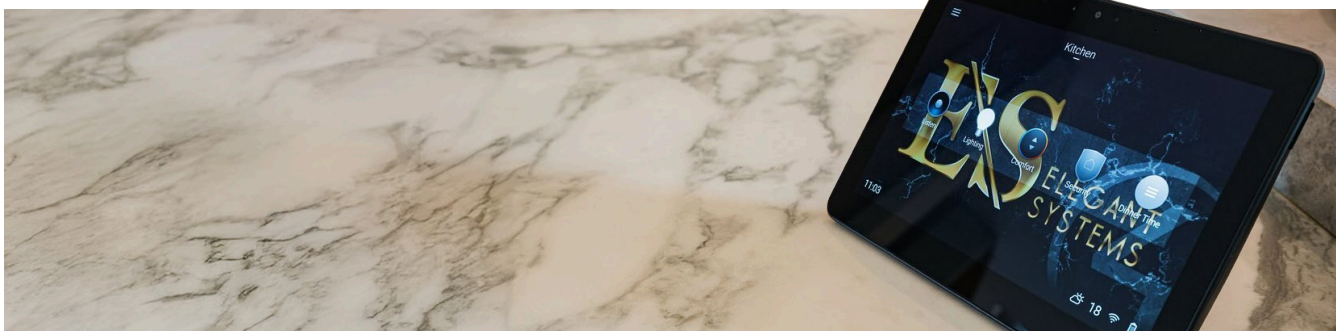

- 01.** Smart home automation
- 02.** Hospitality automation
- 03.** Commercial and building automation
- 04.** Integrated security systems
- 05.** Smart lighting and climate control
- 06.** Home theatre and audio-visual solutions

Every project is customised. No two homes or businesses are the same, so we take the time to understand your needs and create a system that feels personal, practical, and future-ready.

SMART HOMES

Your home should work around you, not the other way around. We design smart home systems that give you complete control over lighting, climate, entertainment, and security through simple, intuitive interfaces. Whether you want a full turnkey solution or a focused upgrade in one area, we tailor everything to suit your space and lifestyle.

With our premium automation systems, everyday routines become effortless. Lights dim automatically for movie night. Music flows through every room. Security systems arm with a single touch. And whether you're at home or away, you're always in control. Smart living should feel natural, and that's exactly what we deliver.

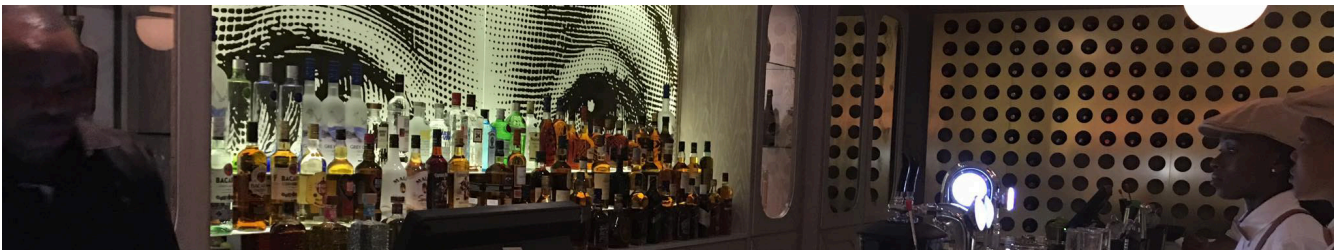

WHAT WE DO

HOSPITALITY AUTOMATION

In hotels and lodges, guest experience is everything. Our hospitality automation systems allow guests to control lighting, temperature, curtains, TV, and music from a single, easy-to-use interface. Wake-up scenes, ambient settings, and personalised room environments elevate comfort while helping staff manage operations more efficiently.

Behind the scenes, these systems also help optimise energy usage and reduce running costs, delivering luxury and efficiency in one seamless solution.

BUILDING AUTOMATION

For commercial spaces, intelligent systems make a real difference. We design building automation solutions that bring lighting, heating, ventilation, and air conditioning (HVAC), security, video conferencing, and access control together into one unified platform. Even smaller implementations can significantly improve efficiency and productivity.

Our systems integrate with existing infrastructure and work across multiple manufacturers, giving businesses flexibility and room to grow.

INTEGRATED SECURITY

Security should be strong and simple. Our integrated security solutions give you complete visibility and control from one smart interface. From remote alarm control and real-time alerts to 24/7 monitoring and automated responses, we make sure your property is protected at all times. Peace of mind shouldn't be complicated.

SMART LIGHTING

Lighting has the power to transform a space. Whether it's a single room or an entire building, our smart lighting systems allow you to adjust ambience at the touch of a button, or automatically based on time, occupancy, or routine. Control lighting through touchscreens, stylish keypads, or even voice commands. It's about creating the right mood while improving efficiency.

HOME THEATRE & AUDIO-VISUAL

BRING THE CINEMA EXPERIENCE HOME.

We partner with leading global brands to design immersive home theatre and media room solutions. From high-end projection systems to Dolby Atmos surround sound, we create unforgettable viewing experiences. With one simple command, the lights dim, the screen lowers, and the sound system comes to life. All you have to do is sit back and enjoy.

WHY CHOOSE ELEGANT SYSTEMS?

Experienced Team:

Years of hands-on expertise in automation across residential, hospitality, and commercial projects.

Seamless Integration:

We connect multiple technologies into one simple, unified system.

Reliable Performance:

High-quality components, expert installation, and dependable aftercare support.

Personal Approach:

We take time to understand your needs and design solutions that truly fit your space and lifestyle.

Dedicated After-Sales Support:

Our service department allows clients to log a ticket for any query or issue. Our technicians can assist remotely or dispatch to site when required — whether it's a major fault like lightning damage or simple guidance on using the system.

OUR VISION

We see a future where technology works quietly in the background; where homes, hotels, and workplaces respond naturally to the people inside them. At Elegant Systems, we don't just install automation. We make spaces smarter. We make life easier. We make technology feel effortless.

TESTIMONIALS

I thoroughly enjoyed working with Elegant Systems. Their upfront advice and guidance was exceptional. Their work ethic and workmanship superb. Their response time is excellent. This team is a fountain of expertise and enthusiasm. Overall Elegant Systems is a highly professional outfit that pride in what they do whilst ensuring the delivery of extraordinary value for money.

Roger Foster
CEO of Airlink

Following the successful installation of our home automation system, we want to congratulate Elegant Systems with their professionalism and great quality service we received throughout the design and installation process of our home automation system. The knowledge, efficiency, quality and friendliness of your personnel exceeded all expectations. Gavin already had a design ready after we only sent through our house plans the previous afternoon. A big pat on the back to Gavin, Philip and team. We will definitely strongly recommend Elegant Systems to anyone who is interested in a home automation system. Well done.

Don & Sonja van der Riet

The service I received from Elegant Systems was excellent from start to end. The after sales service was also brilliant, the team's always willing to help 24/7 and the technicians really know the product well. The Control4 system is a must have, we as a family find the system very user friendly, I would definitely recommend Elegant Systems to everyone.

Serengeti Estate-Dickson

A very professional company from the word go. An excellent after sale service. The technicians are friendly and always courteous. Value for money, Best tech company by far!

Fareed Hajat

What an exceptional service provider! We just love our Control 4 system neat, tidy, user friendly .. absolutely awesome !!! Thanks for a system that's worth every cent !!! View of my consumption and I can manage the usage daily if needed. Our homeowners association inspector gushed about how well everything looked during the post-install inspection. Honest, knowledgeable, and so hard working. I would recommend that you look nowhere else for solar home solutions other than Elegant Systems.

Deryn Barker

Dear Jared and Team, We cannot thank you and your team enough for fixing all our issues and teaching us how the system works. We are really in awe of how you stepped in and even picked up things that we were not aware of. We are indeed considering upgrades and we want no one but Elegant Systems, Jared and Team. You have indeed made us happy and set us on a new journey to experience the system. Let's talk in the near future!
